Christopher T. David
Chief Technology Officer
Arlington County, Virginia

Christopher T. David is the Chief Technology Officer for Arlington County, Virginia - host to the Pentagon and Reagan National Airport. As CTO, he heads daily operations of the County's Department of Technology Services which includes oversight of Arlington's network & telecommunications infrastructure, program management, enterprise data management, and applications development initiatives. His major focus areas are business continuity strategies and leveraging the County's technical investments to enhance E-Gov services. As an adjunct instructor at The American University, Christopher specializes in human factors in technology, multimedia research, and collaborative technologies. He has served on the IT planning committee for the National Association of Counties and currently serves on the Program Advisory Board for the upcoming EGOV Institute Enterprise Architecture Conference & Exposition.

Prior to joining the County in 2001, Christopher served as the AVP for Information Technology at the Association of American Medical Colleges.

A native Washingtonian, he holds a B.A. in experimental psychology from The George Washington University and a M.S. in Information Systems from The American University.
