

## Cisco Systems, Inc. Notable Quotes on Mobility

“HP plays a broad role in delivering mobility solutions that allow people to quickly and easily create connections to their communities, information, entertainment or businesses – in more places,” said Ozzie Diaz, chief technologist, Mobility and Wireless, HP. “Together with Cisco, HP mobile solutions help take mobility to new heights and make the connections to bridge the gap between work, home, and on the go.”

“Across a range of industries both public and private, from government to healthcare to retail, financial services to education and more, IBM has seen the positive impact mobility has on connecting people to their business whether they are mobile within the campus or outside,” said Laurence Guihard-Joly, IBM vice president, Integrated Communications Services. “Cisco business mobility solutions are a core piece of how our services enable rich mobile experiences today.”

“Mobility is a change-agent that drives new possibilities for businesses and people, allowing more business to be conducted virtually any time, anywhere, in ways that were not previously possible,” said David Dorosin, director, product marketing, Enterprise Solutions, Nokia. “Nokia and Cisco are teaming to bring channel partners and their customers innovations such as dual mode phones and complete solutions that allow businesses to utilize their IT and telephony infrastructures and mobile technology investments to an even greater extent.”

“Global competition and an emerging mobile-savvy workforce are catalysts for the adoption of mobility in businesses large and small today,” said Craig Mathias, a Principal with the wireless and mobile advisory firm Farpoint Group. “Mobility is about making work location-independent - something you do, not a place you go. With a broad array of technologies and solutions required to make this vision a reality, Cisco well-positioned to help customers accelerate towards a more mobile world and the fundamental business advantages of mobility.”
