

Point of Command

This Remote Control is designed to give you direct push-button control over Linksys by Cisco Wireless Home Audio devices. Experience your music all around your home – sounding great and at your control, without wires. Wireless Home Audio: the fun, easy way to let your music play, all around your home.

Take Control

Enjoy convenient line-of-sight command of the Wireless Home Audio Conductor, Director and Player devices. Raise or lower volume, build and play cue-lists, set up and play music in different rooms. The power is in the palm of your hand.

What is Wireless Home Audio?

It's an integrated family of devices that is designed to let you access, stream, control and enjoy your digital music via your home wireless network. Enjoy different songs in different rooms at the same time, or the same one everywhere in Party Mode – all in the highest quality. The devices are designed to work with your existing system to create a complete home-filling music experience – no drilling, no stringing wires. However you listen, you can configure a Wireless Home Audio set-up ideally suited to your space, tastes, and existing audio systems.

Remotely control Wireless Home Audio Conductor, Director, and Player devices.

The maximum performance for wireless is derived from IEEE Standard 802.11 specifications. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions.

Specifications are subject to change without notice.
