## You're Using More Cloud Services Than You Think

## **Explosion of cloud use**

Avg # of Cloud Services in Use

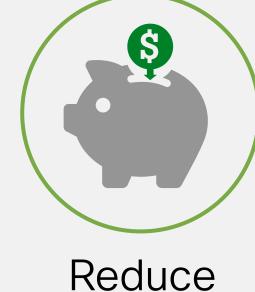

That's 15-25x more than IT estimates!

Employees are bypassing IT to get agility and speed from the cloud. This creates a shadow IT challenge across all industries and company sizes.

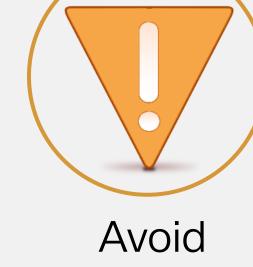

## How can you manage this cloud explosion? CITYID implemented a cloud-first

strategy to fuel its success. But they had challenges monitoring all of the cloud services their employees were using. CityMD needed to understand how to:

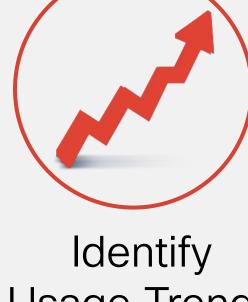

Risks

Cloud Services

**Usage Trends** 

## Introducing: Cisco Cloud Consumption as a Service

Cloud Consumption as a Service helps midsize and

large organizations address shadow IT challenges and successfully manage cloud use for about 1-2 dollars per employee per month. With Cloud Consumption as a Service you can:

Discover and continually

uncover compliance issues

Improve business agility by

monitor public cloud usage Cut cloud costs by

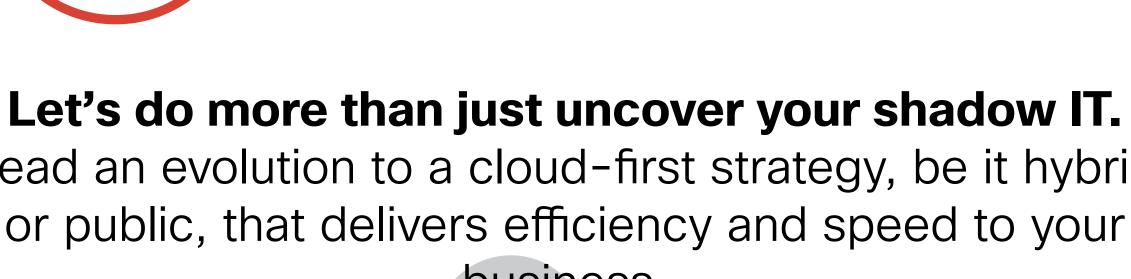

consolidating services Reduce business risk and

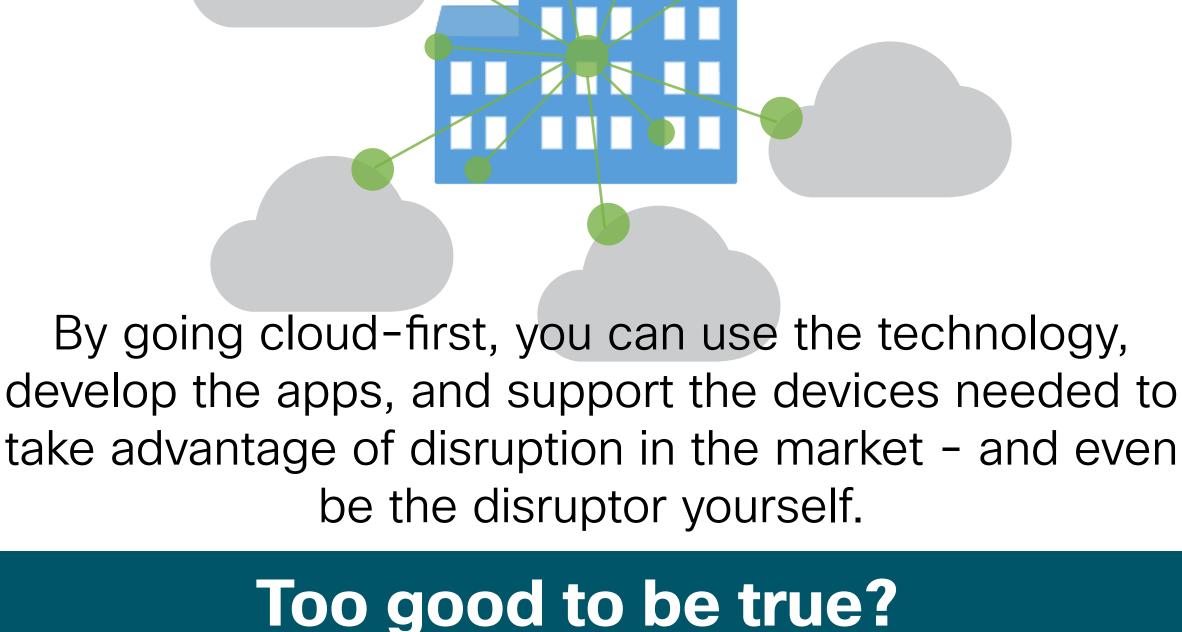

Manage cloud use and benchmark against peers

using the right cloud services Let's do more than just uncover your shadow IT. Lead an evolution to a cloud-first strategy, be it hybrid

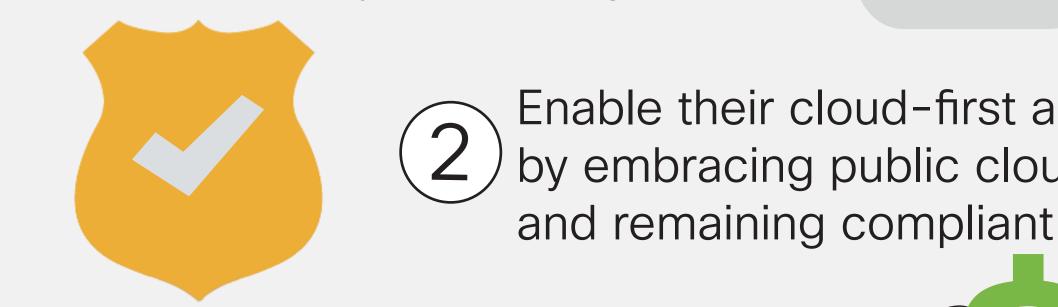

business.

CITY Duses Cloud Consumption as a Service to establish better oversight and management of their cloud environments. This allows CityMD to:

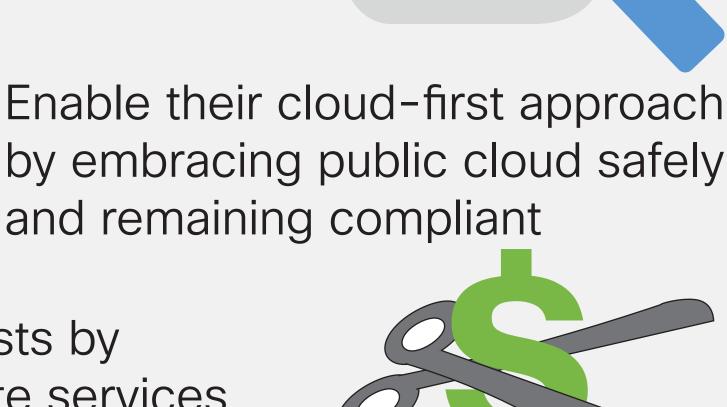

522 cloud providers identifed, with IT only supporting 15-20

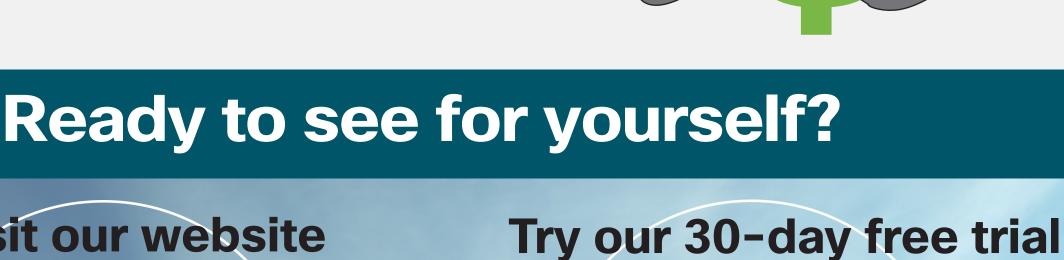

Control cloud costs by

CISCO

Gain full visibility of cloud use-

reducing duplicate services

its affiliates in the U.S. and other countries. (1110R)
