

David Evans

Chief Technologist, Innovations Team Internet Business Solutions Group

David Evans is chief technologist for the Cisco Internet Business Solutions Group (IBSG). IBSG works with the world's leading companies to help them become more competitive through effective business processes and technology deployment.

Evans is the chief architect for the Connected Bus, which is a key element of the Connected Urban Development program's Urban Transportation Technology framework. Evans wrote the software and designed the infrastructure for the bus, which is the first public transit vehicle of its kind to showcase the following combination of technologies: a mobile access router, personal computers, touchscreen monitors, "green" gauge digital displays, and software content.

A Cisco veteran of more than 15 years, Evans joined IBSG from IT, where he most recently managed the global architecture innovations team, focusing on IP telephony, unified messaging, wireless, networked home, and Internet-related technologies.

Evans has a passion for applying technology innovation to real business needs. He is also respected outside Cisco as an expert in emerging technologies and has numerous relationships with thought leaders, including those in the venture capital community.

Evans has garnered numerous awards and recognitions throughout his Cisco career, including the CEO's "Unsung Hero" award, which he has received twice, and numerous other awards for technology innovation and teaming.
